Year 3 Summer
Activities to Prepare
for Year 4

Practise telling the time to the nearest 5 minutes on an analogue clock and converting it to a 24 hour digital clock.

Practise all times tables taught (2, 5, 10, 3, 4, 8) and related division facts eg $10 \times 5 = 50$ so 50 divided by 10 equals 5.

If you are not confident in number bonds to 20 please practise these.

Keep spotting and talking about 3D and 2D shapes and their properties (edges, faces, vertices).

Keep reading as much as you can and talk about what you read with an adult.

Write a diary entry about your favourite day or write a letter to your friend.

Practise spotting words that need a capital letter, look at the Olympics, do the signs have capital letters for country names? Try and spot places where capital letters are not used correctly.
